

1. Provide link to GitHub repository for TAs to view the code? (1 point)

<https://github.com/dean-ferreira/COSC4353>

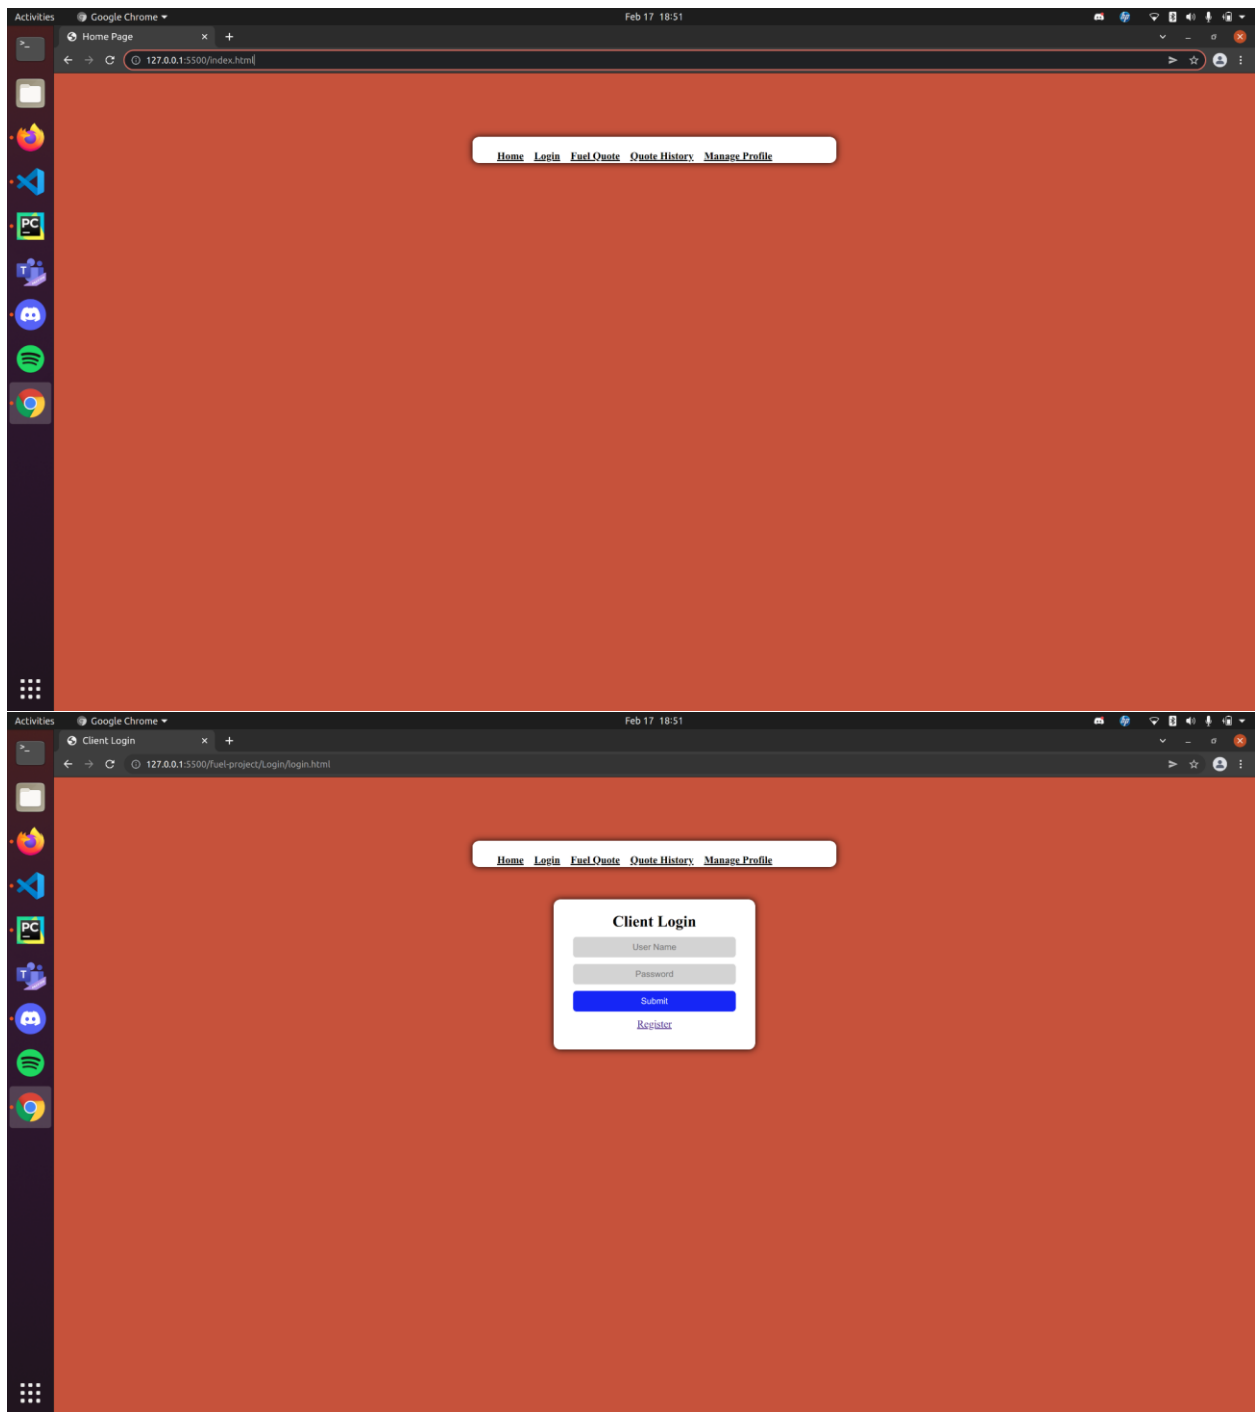

2. Discuss if your design and development methodology has changed since assignment 1 and why? (1 point)

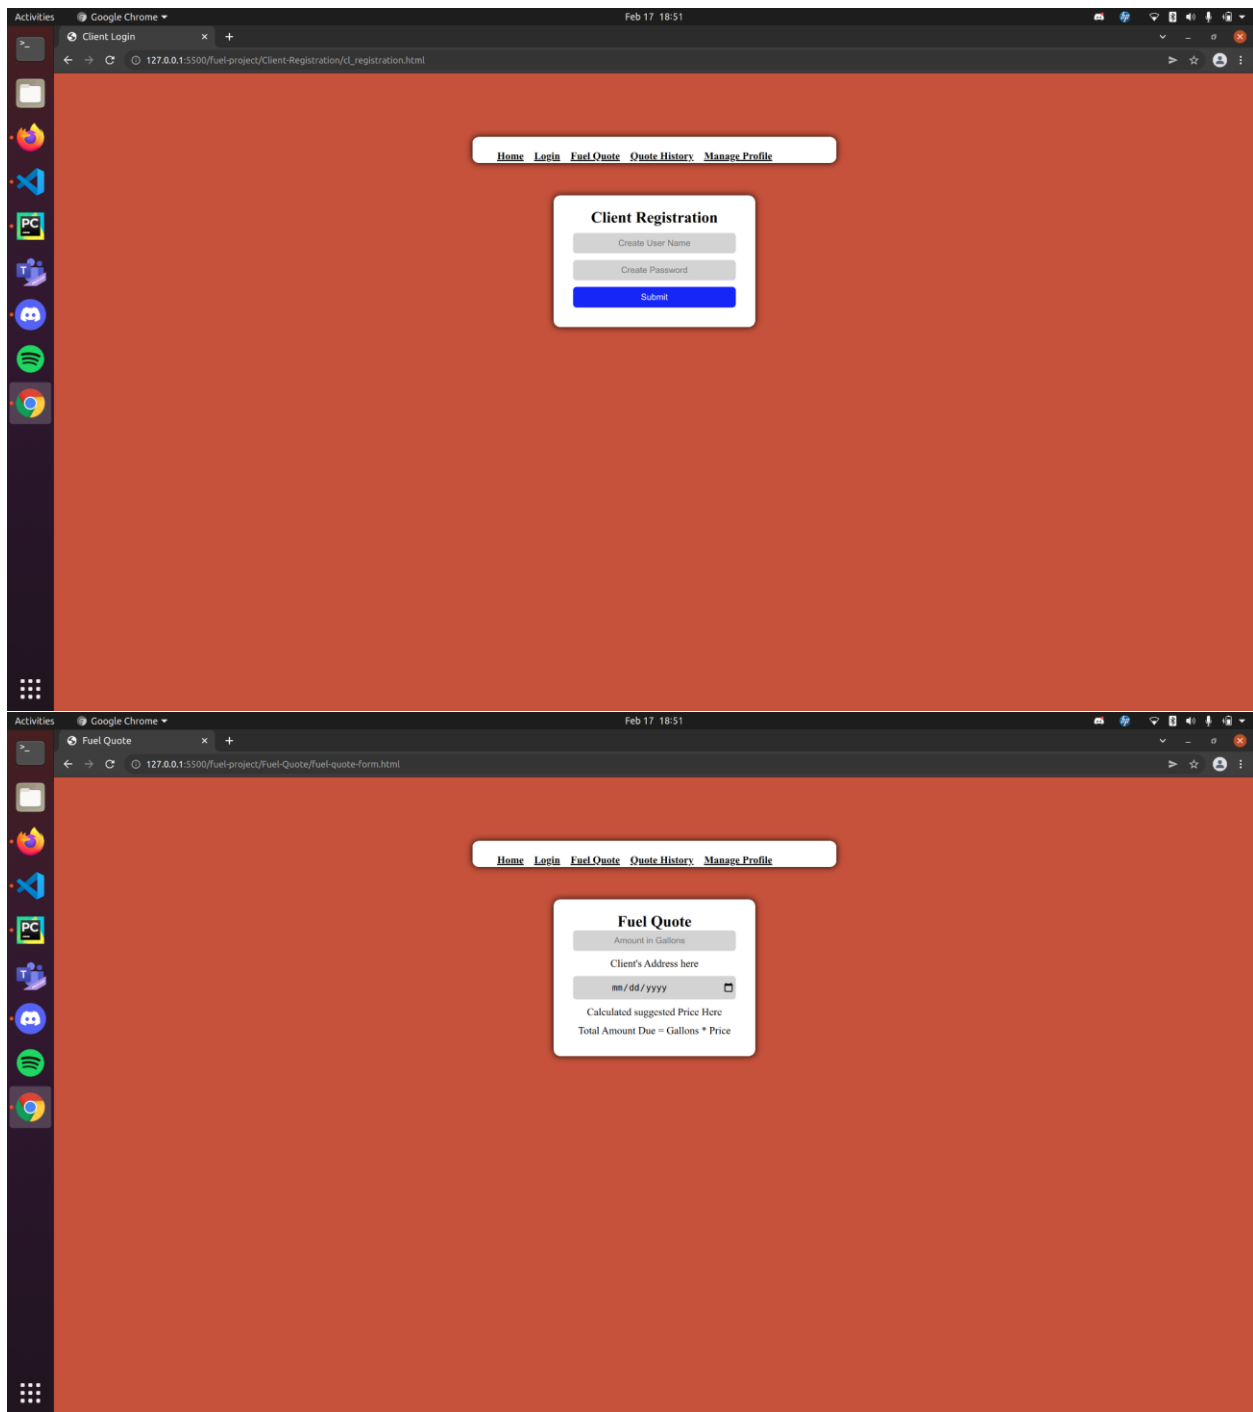

No, we feel comfortable with the Agile methodology we decided on earlier.

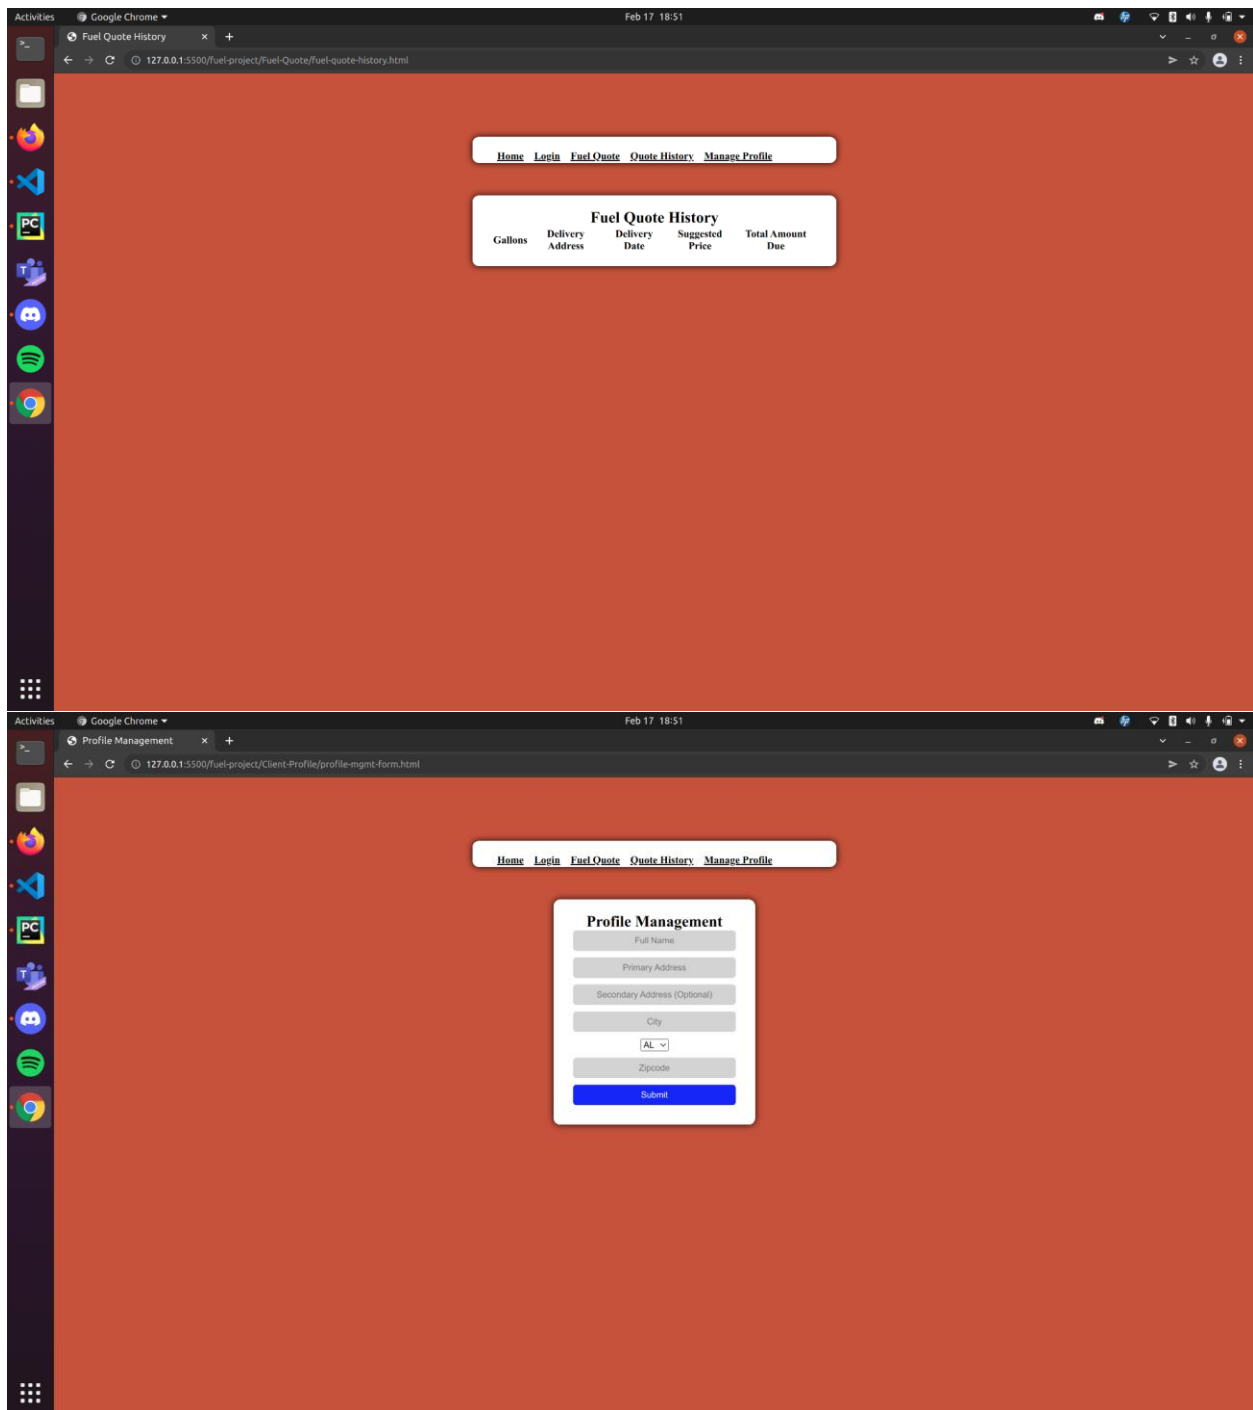

3. List what front end technologies you are using and why. List who is responsible of doing what in your group? (2 points)

HTML, CSS, to handle the front end, we each managed small parts of the pages, effectively working on each page then coming together and working as a group to combine and implement the finished product.

4. Provide screen shots of your front end, each page? (5 points)

5. IMPORTANT: list who did what within the group. TAs should be able to validate in GitHub, otherwise team members who didn't contribute will receive a ZERO. (1 point)

Group Member Name	What is your contribution?	Discussion Notes
Jeremy Rouse	Fuel Quote History Table	Created the history table that will have information once records are created, unable to push to github
Matt Banda	Client login page, Client registration page	Had some difficulty with managing folders and files in github.
Dean Ferreira	Client Profile Management, Fuel Quote Form,	Created forms for the following pages and uploaded all changes to github
